SUMMARY

Computer Science graduate (First Class Honours, Swansea University, 2025) who has completed the Digital Futures Frontier AI Programme, a 12-week full-time course in Python, SQL, statistics, machine learning, cloud and LLMs. Builds and evaluates predictive models using time-based validation and pre-registered tests, and deploys them as interactive apps. Seeking a graduate or junior Data Scientist role.

EDUCATION

Digital Futures
Frontier AI Programme (Data and AI) *Jul 2026 - Sep 2026*

- 12-week full-time programme: AI and Data Essentials, Insight Analytics, Programmatic Data Wrangling, Predictive Modelling and Advanced AI Topics.
- Supervised learning (linear and logistic regression, decision trees, random forests) with feature engineering, encoding and scaling.
- LLM applications through APIs: prompt engineering, grounding, tool use and evaluation (ROUGE, BLEU, LLM-as-judge), with GDPR and responsible AI.

Swansea University Swansea, Wales
BSc Computer Science, First Class Honours *Sep 2022 - Jul 2025*

- Machine Learning assignment 99% (CIFAR-100 image classification with CNN and SVM); Data Science project 94% (Random Forest classifier).
- Web Service Development 82% (REST APIs in Spring Boot); App Development 84% (Android, Kotlin); Algorithms 75%; Database Systems 72% (MySQL, normalisation).

Bassaleg School Newport, Wales
A Levels: ICT (A), Biology (B), Chemistry (B). 8 GCSEs at A to B, including Maths and English*

CERTIFICATIONS

Python Institute: PCAD, Certified Associate Data Analyst with Python (2026)
Google Cloud Certified: Generative AI Leader (2026)
IBM SkillsBuild: Agile Explorer (2026)

PROJECTS

Meta Data: Valorant Pro Pick Recommender | Python, pandas, scikit-learn, Streamlit Sep 2026 - Oct 2026
Capstone project, Digital Futures | valorant-agent-predictor.streamlit.app | GitHub

- Built a recommender whose top 3 contains the pros' actual pick 91.3% of the time on 1,032 unseen 2025 line-ups and 87.4% on 1,772 from 2026, 14 to 15 points above a most-played baseline.
- Compared logistic regression, tree models and gradient boosting with weekly walk-forward evaluation, explained the win model with SHAP, and deployed both in a Streamlit app.
- Using time-based splits and tests written before they ran, found no evidence that agent picks predict the winner (50.8% accuracy against a 52.9% baseline).
- Joined three Kaggle datasets and match dates scraped from vlr.gg (BeautifulSoup) into a 3,262-map table, fixing duplicated player rows, a team-name mismatch that dropped 25 matches, and a file that leaked results.

PCAD Guide: Exam Practice App | Python, pandas, JavaScript, Preact, Pyodide Sep 2026 - Present
mints1104.github.io/PCAD-Guide | GitHub

- Built a study app for the Python Institute PCAD data analyst exam with 421 practice questions, a revision guide and 12 coding notebooks (69 tasks) that run pandas, NumPy and scikit-learn in the browser through Pyodide.
- Wrote verification scripts that run every code answer and notebook solution to confirm it, and a GitHub Actions workflow that builds, validates and deploys the site on every push.

House Price Predictor | Python, pandas, scikit-learn, XGBoost Jul 2025 - Sep 2025

GitHub

- Built an end-to-end regression pipeline on the Kaggle House Prices dataset (1,460 homes, 79 features), covering missing-value imputation, outlier treatment, encoding and scaling.
- Used EDA to guide feature engineering, then compared Random Forest and XGBoost; XGBoost reached R^2 0.89 (RMSE about $29k) on held-out data, documented in a reproducible notebook.

Image Recognition on CIFAR-100 | Python, CNN, SVM Nov 2024 - Dec 2024

- Compared CNN and SVM classifiers on the 100-class CIFAR-100 dataset and wrote up the method and results as a conference-style paper, marked at 99%.

EXPERIENCE

Website Designer May 2025 - Aug 2025

Ace Language Services *Newport, Wales*

- Designed and built a responsive website in HTML, CSS and JavaScript for a translation and interpreting company offering over 150 languages.
- Deployed it on Netlify and configured DNS for the client's domain.
- Added contact forms and on-page SEO, and refined features with the client after launch.

Festive Colleague Dec 2021 - Jan 2022

Tesco *Risca, Wales*

- Served customers in a busy store during the Christmas peak.
- Worked with the team to resolve day-to-day operational issues.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, TypeScript, Kotlin

Machine learning: scikit-learn, XGBoost, TensorFlow, SHAP; linear and logistic regression, decision trees, random forests, gradient boosting, SVM, CNN, PCA

Data: pandas, NumPy, Matplotlib, Seaborn, Jupyter, Streamlit, Tableau, Excel

LLMs and AI: LLM APIs (Gemini, Claude, GPT, Mistral via OpenRouter), prompt engineering, evaluation (ROUGE, BLEU, LLM-as-judge), Hugging Face

Databases and cloud: MySQL, BigQuery, Cloud SQL, MongoDB, Google Cloud, AWS, Docker, Git
