SUMMARY

Computer Science graduate (First Class Honours, Swansea University, 2025) with full-stack experience in React, Node.js, Express and Kotlin, and recent data and AI training from the Digital Futures Frontier AI Programme. Has built, tested and deployed web applications, Android apps and a live client website. Seeking a graduate or junior Software Engineer role.

EDUCATION

Digital Futures
Frontier AI Programme (Data and AI) *Jul 2026 - Sep 2026*

- Full-time, 12-week programme across five modules: AI and Data Essentials, Insight Analytics, Programmatic Data Wrangling, Predictive Modelling and Advanced AI Topics.
- Data engineering: modular Python pipelines with Pydantic validation, logging and API integration, Streamlit deployment, Docker, BigQuery and Cloud SQL.
- SQL and data management: querying, CRUD operations, ERDs and ETL, with databases run locally and on Google Cloud and AWS.
- LLMs: calling models through APIs, prompt engineering, grounding and tool use, and evaluation with ROUGE, BLEU and LLM-as-judge; GDPR and responsible AI.

Swansea University Swansea, Wales
BSc Computer Science, First Class Honours *Sep 2022 - Jul 2025*

- Machine Learning assignment 99% (CIFAR-100 image classification with CNN and SVM); Data Science project 94% (Random Forest classifier).
- Web Service Development 82% (REST APIs in Spring Boot); App Development 84% (Android, Kotlin); Algorithms 75%; Database Systems 72% (MySQL, normalisation).

Bassaleg School Newport, Wales
A Levels: ICT (A), Biology (B), Chemistry (B). 8 GCSEs at A to B, including Maths and English*

CERTIFICATIONS

Google Cloud Certified: Generative AI Leader 2026
IBM SkillsBuild: Agile Explorer 2026

PROJECTS

MKWorld Lounge Stats | React, Node.js, Express, Recharts, Vitest Dec 2025 - Present
mkw-lounge-stats.vercel.app | GitHub

- Built a full-stack dashboard that aggregates competitive Mario Kart data from a public API, with player profiles, match history, a filterable leaderboard and side-by-side charts for up to four players.
- Wrote an Express API layer with in-memory caching, rate limiting and security headers (Helmet), deployed as Vercel serverless functions.
- Added 99 automated tests across components, hooks, utilities and API validation (Vitest, Node test runner, Supertest).

Media Review Platform | React, Node.js, Express, MongoDB Jul 2025 - Aug 2025
media-review-platform.vercel.app | GitHub

- Built a full-stack review platform for games, films and TV with a React frontend and an Express REST API, including full CRUD for reviews.
- Implemented JWT authentication with bcrypt password hashing.
- Deployed the frontend on Vercel, the API on Render and the database on MongoDB Atlas, with environment-based configuration.

Meta Data: Valorant Pro Pick Recommender | Python, pandas, scikit-learn, Streamlit Sep 2026 - Oct 2026

Capstone project, Digital Futures | valorant-agent-predictor.streamlit.app | GitHub

- Built a pick recommender that places the professional team's actual pick in its top 3 for 91.3% of 1,032 unseen 2025 line-ups and 87.4% of 1,772 line-ups from 2026, 14 to 15 points above a most-played baseline.
- Structured the pipeline as tested Python modules, with automated checks that features only use past data and that the app handles awkward inputs; deployed on Streamlit Community Cloud.

Remindication | Kotlin, Firebase, Retrofit Oct 2024 - May 2025

GitHub

- Built an Android medication reminder app with Firebase Authentication, real-time Firestore sync and API calls through Retrofit.

Quiz Application | Kotlin, Firebase, REST APIs Sep 2024 - Dec 2024

GitHub

- Built an Android quiz app with sign-in, leaderboards, quiz history and categories, loading questions from a REST API.

EXPERIENCE

Website Designer May 2025 - Aug 2025

Ace Language Services *Newport, Wales*

- Designed and built a responsive website in HTML, CSS and JavaScript for a translation and interpreting company offering over 150 languages.
- Deployed it on Netlify and configured DNS for the client's domain.
- Added contact forms and on-page SEO, and refined features with the client after launch.

Festive Colleague Dec 2021 - Jan 2022

Tesco *Risca, Wales*

- Served customers in a busy store during the Christmas peak.
- Worked with the team to resolve day-to-day operational issues.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, Kotlin, SQL, C#

Frontend: React, React Router, HTML, CSS, Material UI, Next.js

Backend: Node.js, Express, Spring Boot, REST APIs, JWT authentication

Databases and cloud: MySQL, MongoDB, Firebase (Auth, Firestore), BigQuery, Google Cloud, AWS, Docker, Vercel, Render, Netlify

Testing and tools: Vitest, Supertest, Git, GitHub, Agile, Android Studio, IntelliJ, VS Code

Data and ML: pandas, NumPy, scikit-learn, Streamlit
